# TELEPHONE SYSTEMS

ADVANTAGE COMPUTER ENTERPRISES

*Our phone systems with VoIP technology are designed to support communications of both voice and data converged into a single streamlined data network.*

## What is IP Telephony?

### In a single system, the MAX1000 provides:

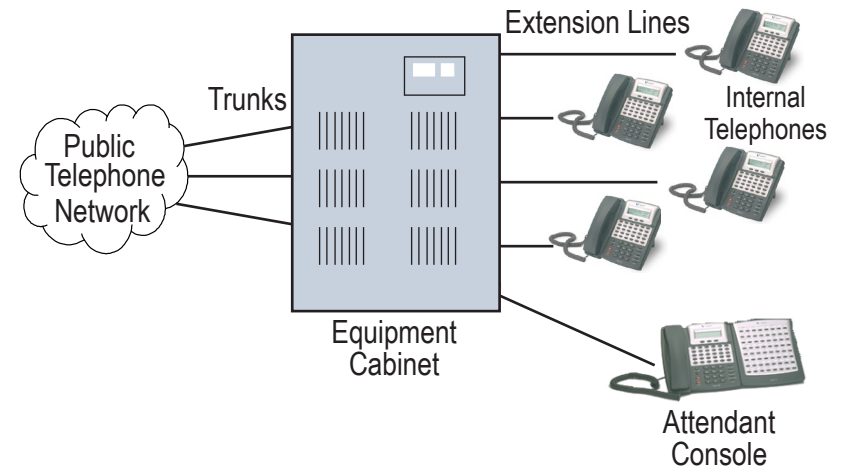

- ♦ Support for up to 48 extensions per system
- ♦ Integrated Voicemail with 4500 hours of storage
- ♦ ExtensionAnywhere™ and One Number Access mobility solutions
- ♦ Meet-me Conference Bridge
- ♦ Call Recording
- ♦ Customized Auto Attendants
- ♦ T1/PRI/E1/FXS PSTN trunking support

### Benefits of VoIP with the MAX1000

- ♦ Telecommuters now have a working corporate telephone extension at home or on the road
- ♦ Unified corporate appearance over multiple locations
- ♦ **Reduced Long Distance toll Charges through Voice over IP trunking**

## What is a Digital Telephone System?

The DX-120 Business Communications System is designed to give growing enterprises all the sophisticated communications features of big-company digital systems in an affordable, easy to use and highly scalable package.

### Digital System Features

- ♦ Built-In Caller ID
- ♦ Direct Inward Dialing (DID): With T1 or ISDN PRI trunking
- ♦ Uniform Call Distribution (UCD)
- ♦ Public Address Interface (Overhead Paging)
- ♦ Fax Detection
- ♦ Music-on-Hold
- ♦ Optional Voicemail Module
- ♦ Auto Attendant
