## Electronic Payment Processing Solutions

### Online Payment Processing

Jayhawk Software along with Modern Payment Software can generate an Online Payment page that is integrated with the software to allow you to accept payments through your Web site.

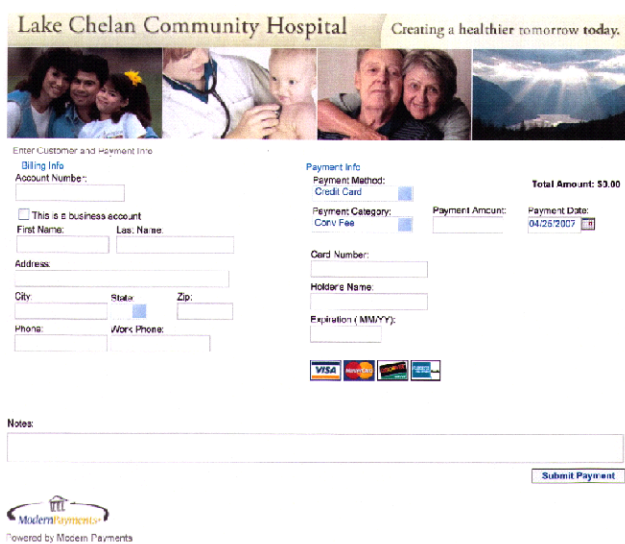

The ONLINE PAYMENT Product will allow you to:

- ◆ Accept Checking, Savings, and Credit Card payments through your Web site, opening up a new payment channel from your customers
- ◆ Mail invoices inviting customers to “Pay their bill Online,” thus automating your receivables and accelerating cash flow

### How It Works!

Using a Web-form that is generated by the payment system, your business can:

- ◆ Privately brand the Web-form with your logo and colors
- ◆ Enter any disclaimer message that you desire
- ◆ Add payment convenience fees
- ◆ Accept credit cards with real-time authorization so your customers know if the credit card was authorized
- ◆ Once a payment is entered, the transaction is processed and all data is recorded into the payment system

FEATURES	BENEFITS
Confirmation Emails/Message Board	You are notified immediately when someone has paid Online
Confirmation Number	The system will generate a confirmation number for the customer when the payment has been completed
Auto-Generated Receipt	Once the payment has been made, the customer can print the page for their records
Notes Section	Customers can include notes when making the payment for easy communication
Integrated Options	For clients that want to keep their own continuity, you can build your own form, and integrate our back end processor

# Offer Direct Payment of Utility Bills with ACH Payment Processing

## ACH Payment Processing

Jayhawk Software along with Modern Payment Software is connected to the Federal Reserve Banking System that allows you to process payments from a checking or savings account via the ACH Network.

### The ACH Product Allows You To:

- ◆ Accept Check-by-Phone payments
- ◆ Accept check payments from a Web site
- ◆ Accept automated-installments from a checking or savings account

### How It Works!

Using the “Create Payment” Screen your office can:

- ◆ Create a one-time payment for today or a post-dated transaction
- ◆ Create monthly, weekly, quarterly, or twice-monthly payments
- ◆ Add payment surcharges or service fees
- ◆ Add and calculate interest fees

Once a payment schedule is created, the payment system will send an email confirmation to your customer with all of the payment details, including any notes you wish to add.

FEATURES	BENEFITS
Internet-based	NO hardware to purchase, or software to manage
Automated Payment Scheduler	Save time and effort by automating payments
Payment Retry Button	If payment if returned for Non-Sufficient Funds, you can retry the payment up to 2-times
Email Confirmation	Once a payment is created, the customer is sent a confirmation email
Batch Processing/Auto Uploads	Large transaction amounts can be uploaded in batches
User Friendly	Easy to learn • Easy to use • Easy to manage
